

CTIS 256

Midterm 1 – Part 1

Due Date : 5 April 2020, Sunday, 23:55

Submission: Through Moodle (do not send me email)

Assesment: 50% of Midterm 1

Policy: Cheating is strictly prohibited. Some of the students whose grade above 40 out of 50 will be interviewed. If I am not satisfied with the answers, s/he will get 0.

Question: Write a Web application that shows orders of male and female users. You are given “*db.php*” file that contains two arrays, \$users and \$orders. They contain all related information about user name, age, product name and price. **Do not forget to watch the given video file “*mt1_part1_video.mkv*” that explains what you are supposed to do.**

Grading (out of 50):

- **(2Pts)** Top Navigation Bar
- **(2Pts)** Title page (name surname part)
- **(4Pts)** Remember “Female” or “Male” link is clicked.
- **(5Pts)** Calculate the age of the user
- **(16Pts)** Display all user orders (with/without paging)
- **(4Pts)** Display users according to the gender.
- **(4Pts)** All records will be ordered by Users’ name in ascending order.
- **(3Pts)** At the bottom, add pagination component with actual page size.
- **(5Pts)** Click a page number shows the correct page content.
- **(5Pts)** Prev and Next page links should work appropriately (check the boundaries)
